Emergency Department Note

SYNTHETIC DOCUMENT - generated for software testing, not a real patient record

Case ID	SYN-0002	**Age / Sex**	19 / F
Setting	Emergency Dept	**Primary dx**	Mild TBI / concussion

Chief complaint

Headache and confusion after fall during a sports match.

History of present illness

Struck head on the ground after a collision playing football 2 hours ago. Possible loss of consciousness for under 1 minute per teammates. Since then headache, nausea, and repeated questions about what happened. No vomiting. Amnesia for the event and the 10 minutes before it.

Past history / medications

Migraine without aura. Combined oral contraceptive. No anticoagulants.

Examination

Vitals normal. 3 cm left parietal scalp swelling, no step-off. Pupils equal and reactive. No focal deficit, normal gait on tandem. Slow to answer, disoriented to time.

Glasgow Coma Scale

Eyes open when spoken to. Speaks in full sentences but is confused (wrong date, repeats questions). Obeys commands fully.

GCS on arrival	Score	Response
Eye opening (E)	3	To voice
Verbal (V)	5	5 - Oriented
Motor (M)	6	Obeys commands
TOTAL GCS		**14**

Investigations

CT head performed per Canadian CT Head Rule (amnesia over 30 min of pre-impact events not met; GCS under 15 at 2 h met): no fracture, no intracranial hemorrhage.

Assessment

Mild traumatic brain injury (concussion), GCS 14 on arrival, improving to 15 at 4 h observation.

Plan / disposition

Discharged with responsible adult after observation. Written head-injury advice, relative rest 24-48 h, graded return to activity, no sport until symptom free. Return if worsening headache, vomiting, drowsiness, or seizure.
